- Team Collaboration

PROFESSIONAL SUMMARY

Full Stack Developer and Cyber Security Enthusiast with ****5 years**** of practical experience in web programming and server management. Proficient in building scalable web applications using Next.js, React, and Laravel, combined with strong expertise in cloud infrastructure (GCP, Azure, AWS). Adept at identifying vulnerabilities as a Bug Hunter with a deep understanding of secure coding practices. Proven ability to lead development teams.

EXPERIENCE

Freelance Full Stack Developer

2021 – Present

Self-Employed / Remote

- Delivered robust web solutions for diverse clients, ranging from crypto platforms to tourism portals.
- Project: UglyDog.meme (Crypto/Web3):** Developed a high-performance crypto coin landing page using **Next.js** and **Laravel**, ensuring fast load times and secure transaction references.
- Project: Bromo Ijen Expedition:** Built a custom high-performance tourism platform using **Next.js** and **MySQL**, optimizing SEO and booking flow to increase user conversion significantly.
- Project: Twins Rental Motor:** Built a vehicle rental management system focusing on user-friendly UI and responsive design.

Cloud Administrator & Bug Hunter

2021 – 2023

Freelance / Independent

- Managed and secured cloud infrastructure across **GCP, Azure, and AWS**, ensuring 99.9% uptime.
- Conducted vulnerability assessments and penetration testing (Bug Hunting) to identify security loopholes in web applications.
- Implemented server hardening techniques to protect against DDoS attacks.

Lead Developer (Game Server)

2022 – 2023

Pahlawan Roleplay (SAMP)

- Developed a custom Content Management System (CMS) for a SAMP (San Andreas Multiplayer) server.
- **Tech Stack:**** Utilized **Tailwind CSS** for a modern frontend interface and **Node.js** with **MySQL** for a high-performance backend.
- Optimized database queries to handle high-concurrency player data, reducing server latency significantly.
